

Guidebook

Overview of English content in the [Ons Geld archive](#).

From debt-based to cash-only

Our money system consists of claims to money, backed by financial assets: debt. If the debt is not serviced, money is at risk. That is why governments prioritise collecting taxes and servicing of debts.

A personal safe account for everyone

Ons Geld advocates the introduction of a personal safe account. Safe accounts are held at a public depository and accessed via a payment environment of choice. The market provides payment convenience. The government ensures stability and works towards the implementation of digital cash.

Digital cash

Ons Geld advocates the introduction of digital cash. What is that, and why is it important?

Ons Geld Foundation

Ons Geld raises awareness and promotes public debate about the money system and its reform. Ons Geld strives for a socially responsible and fair money system that serves society at large.

Human rights

The present money system subjects peoples right of self-determination to limitations, and hampers free pursuit of their economic, social and cultural development. By supporting this money system, States do not enable the peoples to flourish to their full potential. They fail to sufficiently provide and maintain circulation of “State issued debt and interest free money”. To the detriment of peoples they actively promote general use of “commercial debt money” instead.

Vollgeld

Ons Geld and the Vollgeld Initiative are similar but not identical. We both argue that money creation should primarily serve the public interest and not the interest of financial institutions. To that end, money creation must become a public task, rather than a private business. However, we differ in the implementation.
